CONTENTS

Volume 80, Number 1, January 13, 1978

AUTHOR INDEX, Volume 80, Number 1, January 13, 1978	ii
M. E. PARHAM and G. MARC LOUDON. Carboxyl-Terminal Sequential Degradation	1
M. E. PARHAM and G. MARC LOUDON. A New Method of Determination of the Carboxyl-Terminal Residue of Peptides	7
ROBERT GAST, IAN R. NEERING, and JOHN LEE. Separation of Blue Fluorescence Protein from Bacterial Luciferase	14
TORBJORN LJONES and R. H. BURRIS. Evidence for One-Electron Transfer by the Fe Protein of Nitrogenase	22
LYLE S. RICE and CLAUDE F. MEARES. Subunit Contacts of the Rifamycin Binding Site of RNA Polymerase (<i>B. subtilis</i>)	26
C. BISWAS, W. P. MORAN, K. J. BLOCH, and J. GROSS. Collagenolytic Activity of Rabbit V ₂ -Carcinoma Growing at Multiple Sites	33
GERTRAUD MAZUR and ANTON SCHWEIGER. Identical Properties of an mRNA-Bound Protein and a Cytosol Protein with High Affinity for Polyadenylate	39
MAURIZIO MINETTI, ANGELA TEICHNER, and PATRIZIA ADUCCI. Interaction of Neutral Polysaccharides with Human Erythrocyte Membrane: Involvement of Phospholipid Bilayer	46
GEROLF GROS and CHRISTIAN BAUER. High pK Value of the N-Terminal Amino Group of the γ -Chain Causes Low CO ₂ Binding of Human Fetal Hemoglobin	56
SUSAN T. LORD and ESTHER BRESLOW. Nuclear Magnetic Resonance Spin Label Studies of Neurophysin: Evidence for Secondary Peptide-Binding Sites	63
GEORGE A. DUNAWAY, GEORGE L.-Y. LEUNG, MORRIS D. COOPER, JAMES R. THRASHER, and S. R. WAGLE. Distribution of Hepatic Phosphofructokinase Isozymes in Parenchymal and Sinusoidal Cells	71
SYLVIA A. BRADDON. Stimulation of Ornithine Decarboxylase by Relaxin	75
JAMES B. RAGLAND, PHILLIP D. BERTRAM, and SEYMOUR M. SABESIN. Identification of Nascent High-Density Lipoproteins Containing Arginine-Rich Protein in Human Plasma	81
MAURICE DICKINS, JAMES W. BRIDGES, CLIFFORD R. ELCOMBE, and KARL J. NETTER. A Novel Haemoprotein Induced by Isosafrole Pretreatment in the Rat	89
WIM GAASTRA, GERBEN KOOPMANS, and FRITS K. DE GRAAF. Circular Dichroism and Structure-Function Relationships in Cloacin DF13-Immunity Protein Complex	97
ROBERT L. HYAMS and DAVID E. GRIFFITHS. Studies of Energy-Linked Reactions: Stimulation of the Mitochondrial Pi-ATP Exchange Reaction by Oleoyl Lipate, Oleoyl CoA and Oleoyl Phosphate	104
HIDEO NISHIGORI, V. K. MOUDGIL, and DAVID TOFT. Inactivation of Avian Progesterone Receptor Binding to ATP-Sepharose by Pyridoxal 5'-Phosphate	112
STELLA Y. CECI and LOUIS J. IGNARRO. Cytidine 3',5'-Monophosphate (Cyclic CMP) Formation by Homogenates of Mouse Liver	119
SYBIL L. CHEN and ARMAND J. FULCO. The Cerulenin-Induced Formation of 1-Acyl-lysophosphatidyl Glycerol in <i>Bacillus megaterium</i>	126
SYBIL L. CHEN, FRANK J. LOMBARDI, and ARMAND J. FULCO. The Temperature-Mediated Metabolism of 1-Acyl-lysophosphatidyl Glycerol in Cerulenin-Treated Cultures of <i>Bacillus megaterium</i>	133
INGMING JENG. On the Structural Similarity of ApoA-I and ApoA-II of Human High Density Lipoproteins	140
BETTY M. DEAN, DAVID PERRETT, and MAURIZIO SENSI. Changes in Nucleotide Concentrations in the Erythrocytes of Man, Rabbit and Rat during Short-Term Storage	147
MARION H. O'LEARY and CRAYTON J. YAPP. Equilibrium Carbon Isotope Effect on a Decarboxylation Reaction	155
STEPHEN C. BONDY and MARILYN E. HARRINGTON. Widespread Occurrence of Specific, High Affinity Binding Sites for Amino Acids	161
CHARLES D. BOYER and JACK PREISS. Multiple Forms of Starch Branching Enzyme of Maize: Evidence for Independent Genetic Control	169
J. J. EGAN, R. J. MAJESKA, and G. A. RODAN. Adenylate Cyclase Enhancing Factor from Rat Osteosarcoma Cytosol	176
ROBERT J. DELORENZO and STEVEN D. FREEDMAN. Calcium Dependent Neurotransmitter Release and Protein Phosphorylation in Synaptic Vesicles	183
J. K. POLLAK, ROSEMARY SUTTON, and MARTIN KLINGENBERG. The Adenine Nucleotide Translocator in Foetal, Suckling and Adult Rat Liver Mitochondria	193
ISAO MORISHIMA and TOSHIRO INUBUSHI. ¹⁵ N NMR Studies of the Binding of ¹⁵ N-Labeled Cyanide to Various Hemoglobins in Intact Erythrocyte	199
ALLAN R. TALL and YVONNE LANGE. Incorporation of Cholesterol into High Density Lipoprotein Recombinants	206

RICHARD L. TAYLOR, HILDA B. GJIKA, and HELEN VAN VUNAKIS. Radioimmunoassay for N ⁶ (Methylnitroso)adenosine: Production and Characterization of Antibodies	213
STUART L. MARCUS and STEVEN W. SMITH. Hydrophobic Interaction of Retroviral DNA Polymerases with Alkyl-Agarose Matrices	220
C. A. H. BIGGER, J. E. TOMASZEWSKI, and A. DIPPLE. Differences between Products of Binding of 7,12-Dimethylbenz[a]anthracene to DNA in Mouse Skin and in a Rat Liver Microsomal System	229
HSIN-HSIUNG TAI and BARBARA YUAN. On the Inhibitory Potency of Imidazole and Its Derivatives on Thromboxane Synthetase	236
W. R. PATTERSON and C. J. GAUNTT. Production of Group- and Type-Specific Antigens during Non-Permissive Infection of Dog Kidney Cells with Herpes Simplex Virus Type 2	243
MARCEL WAKS, MONIQUE ROGARD, and NICOLE CITTANOVA. The Association Equilibrium between Haptoglobin and Apohemoglobin	252
W. H. DILLMANN, H. L. SCHWARTZ, and J. H. OPPENHEIMER. Selective Alterations in Hepatic Enzyme Response after Reduction of Nuclear Triiodothyronine Receptor Sites by Partial Hepatectomy and Starvation	259

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) 115, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [³²P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1974) 160, iii–xii. Reprints are available from the Publisher.

Footnotes, references, and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black density*.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chatterraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363–370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298–302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
